KITAJSKI NAGELJ rdeč KARANFIL KINESKI crveni

(*Dianthus chinensis*)

INDIAN PINKS - CHINESERDELKE - GAROFANO DELLA CINA ROSSO

KITAJSKI NAGELJ RDEČ - sejemo ga v zaprto gredo in na prosto. Uporabljamo ga kot enoletnico, vendar je polprezimmno trden. Rastlina je nizka in cveti celo poletje. Sejemo ga na gredice in v okrasna korita. Seme kali približno 10 dni. Rad ima apnenčasta tla, uspeva pa tudi drugod.

KARANFIL KINESKI CRVENI - sijemo ga u zatvorenu gredicu i na otvoreno. Koristimo ga kao jednogodišnjicu, no tijekom zime je poluotporan. Biljka je niska i cvate tijekom čitavog ljeta. Sijemo ga na gredice i u ukrasna korita. Sjeme klija približno 10 dana. Voli vapnenasto tlo, a uspeva i na drugim mjestima.
